Index to
TRANSACTIONS OF THE ASME

Volume 86, 1964

There are five journals issued quarterly: **Journal of Engineering for Power** in January, April, July, and October; **Journals of Engineering for Industry** and of **Heat Transfer** in February, May, August, and November; **Journals of Basic Engineering** and of **Applied Mechanics** (Volume 30) in March, June, September, and December.

P	Power
I	Industry
HT	Heat Transfer
B	Basic
AM	Applied Mechanics
(D)	Discussion of paper
(AC)	Author's Closure
(BR)	Book Review

A

ABBOTT, B. W.
Note on the sealing of large bore pressure vessels....B 637

ABLATION
Variational analysis of ablation for variable properties....HT 437

ABRASIVES. *See* GRINDING

ABRIKOSOV, A. A. (author)
Methods of quantum field theory in statistical physics (BR)....AM 735

ACCELERATORS
Performance of a crossed-field magneto-aerodynamic accelerator....AM 409

ACOUSTICS. *See* FLOW OF FLUIDS, HEAT TRANSFER

ACTUATORS. *See* SERVOMECHANISMS

ADAMS, D. E.
Transient forced convection from a flat plate subjected to a step energy input....HT 253

ADDY, A. L.
On the starting characteristics of supersonic ejector systems....B 861

ADHESIVES
Viscoelastic boundary damping of beams and plates....AM 61

ADKINS, A. W.
Digital computer program for the general axially symmetric thin-shell problem (AC)....AM 155

AERODYNAMICS
Unsteady forces due to propeller-appendage interactions (D)....AM 359, 568
Vorticity of a body of revolution at an angle of attack....B 845

AGGARWAL, H. R.
Bilinear theories in plasticity and an application of two-dimensional wave propagation....AM 181

AGRAWAL, H. C.
Variational analysis of ablation for variable properties....HT 437

AINSWORTH, F. W.
Poppet valve stability (D)....B 212

AIR. *See* GASES

AIR POLLUTION
Removal of sulfur oxides from flue gas with alkalized alumina at elevated temperatures....P 353

AIR TRANSPORT. *See* AIRPLANES

AIRFOILS
Asymmetric inlet flow in axial turbomachines....P 18
Theoretical design of a high-head axial-flow reversible pump-turbine....P 84

AIRPLANES
Thrust nozzles for supersonic transport aircraft....P 97

ALBRECHT, P.
High-strength tool geometry—a result of research in tool geometry....I 70

ALDRICH, E. W.
Vapor pressure tables for water....HT 279

ALEXANDER, J. M.
Upper-bound approach to cold-strip rolling (D)....I 46

ALFORD, J. S.
Protection of labyrinth seals from flexural vibration....P 141

ALGEBRA. *See* MATHEMATICS

ALLEN, C. M.
Rheological behavior of the lubricant in the contact zone of a rolling contact system....B 423

ALLEN, R. W.
Friction and heat-transfer measurements to turbulent pipe flow of water (Pr = 7 and 8) at uniform wall heat flux...HT 301

ALMEN, J. O. (author)
Residual stresses and fatigue in metals (BR)....AM 368

ALUMINA
Removal of sulfur oxides from flue gas with alkalized alumina at elevated temperatures....P 353
Variational analysis of ablation for variable properties....HT 437

ALUMINUM
Influence of mean stress on the mechanical hysteresis loop shift of 1100 aluminum....B 673
Note on the early plastic deformation of aluminum crystals in simple tension....AM 711
Relationship between fracture toughness and stress concentration factors for several high-strength aluminum alloys....B 709
Tensile plastic stress-strain relations of 2017-T4 aluminum alloy under hydrostatic pressure....AM 551

ALVEY, C. D.
High performance low pressure turbine elements (D)....P 391

AMBA-RAO, CHINTAKINDI L.
On the vibration of a rectangular plate carrying a concentrated mass....AM 550

AMES, W. C., JR.
Hydrogen embrittlement at Linden Generating Station....P 347

AMES, W. F.
Dynamic stability of rotating shafts in viscous fluids (critical speed determination)....AM 291
Extension of a method of solution for Poisson's equation (AC)....AM 568

AMPLIFIERS. *See* JETS

ANDERSON, J. R.
Use of compressor-inlet prewhirl for the control of small gas turbines....P 136

ANDERSON, W. J.
Rheological behavior of the lubricant in the contact zone of a rolling contact system (D)....B 434

ANG, D. D.
Bending stress in a cracked plate on an elastic foundation (AC)....AM 366

ANGRIST, S. W.
On the choice of coordinates used to describe thermoelastic and thermomagnetic generators (AC)....AM 566
Thermoelectric-hydromagnetic pump....HT 166

ANTIFRICTION BEARINGS
Effects of misalignment on the forces acting on the retainer of ball bearings....B 449
Rolling-element bearings (a literature review)....B 374

ANVILS. *See* HIGH-PRESSURE RESEARCH

APPELDOORN, J. K.
Rheological behavior of the lubricant in the contact zone of a rolling contact system (D)....B 432

APPLEBY, E. J.
Dynamic viscoplastic expansion of a cylindrical tube....AM 654

ARENZ, R. J.
Uniaxial wave propagation in realistic viscoelastic materials....AM 17

ARMIENTO, D. F.
Fracture toughness and pressure vessel performance....P 465
Relationship between fracture toughness and stress concentration factors for several high-strength aluminum alloys....B 709

ARWAS, E. B.
Analysis of plain cylindrical journal bearings in turbulent regime....B 387

ASTILL, K. N.
Developing laminar flow and pressure drop in the entrance region of annular ducts (D)....B 833
Studies of the developing flow between concentric cylinders with the inner cylinder rotating....HT 383

ATKINSON, G. L.
Void fraction measurements in a cavitating venturi....B 265

ATTIA, A. Y.
Deflection of spur gear teeth cut in thin rims....I 333

AUDETTE, RICHARD R.
Gas turbine silencers (D)....P 61

AUSLAENDER, J.
Supercavitating foils with flaps beneath a free surface....B 197

AUSMAN, J. S.
Amplitude frequency response analysis and synthesis of unfactored transfer functions....B 32

AUTOMATIC CONTROL. *See also* GRAPHICAL METHODS, MATHEMATICS, NONLINEAR SYSTEMS
Linear digital control....B 61
Minimum fuel control of a second-order linear process with a constraint on time-to-run....B 160
New method of locating the maximum point of an arbitrary multipeak curve in the presence of noise....B 97
Optimal bang-bang control with quadratic performance index....B 107
Optimum control of distributed-parameter systems....B 67
Relative stability via the direct method of Lyapunov....B 87
Simple stability criterion....B 44
Solution to the sampled, minimum-time problem....B 145
Some applications of the maximum principle to second-order systems, subject to input saturation, minimizing error, and effort....B 11
Stability study of PWM feedback systems....B 80
When is a linear control system optimal?....B 51

AVITZUR, BETZALEL
Analysis of wire drawing and extrusion through conical dies of large cone angle....I 305
Upper-bound approach to cold-strip rolling....I 31

B

BACON, H. E.
Case histories of hydrogen damage in boilers....P 307

BAHNKE, G. D.
Effect of longitudinal heat conduction on periodic-flow heat exchanger performance....P 105

BAILEY, J. K., JR.
Analysis of an improved planetary gear-transmission bearing (D)....B 461

BAKER, R. A.
High performance low pressure turbine elements (D)....P 391

BAKER, W. E.
Vibration frequencies for uniform beams with central masses....AM 335

BALANCING. *See* ROTORS, VIBRATION

BALDUR, R.
Theoretical design of a high-head axial-flow reversible pump-turbine....P 84

BALJÉ, O. E.
Study on Reynolds number effects in turbomachines....P 227
Typical performance characteristics of gas turbine radial compressors (D)...P 170

BALL BEARINGS. *See* ANTIFRICTION BEARINGS

BANAUGH, R. P.
Diffraction of steady elastic waves by surfaces of arbitrary shape (AC)...AM 571

BANKOFF, S. G.
Laminar film condensation on a porous vertical wall with uniform suction velocity....HT 481

BARCHILON, M.
Some details of the structure of an axisymmetric confined jet with backflow.B 777

BARS. *See also* BEAMS
Torsion of bars with isosceles triangular and diamond sections....AM 332

BART, R.
Experimental study of the strength of standard flanged and dished and ellipsoidal heads convex to pressure....I 188

BASSETT, M. B.
Plastic stress-strain relationships—some experiments to derive a subsequent yield surface....AM 676

BAUER, H. F.
Breathing vibrations of a partially filled cylindrical tank—linear theory (D) ....AM 569

BAUMAN, J. M.
Critical flow function for superheated steam....B 507

BEAMS
Impact on an elastically connected double-beam system....AM 621
Motion of a stretched string carrying a moving mass particle....AM 29
On the vibration of a thick ring in its own plane....I 240
Plastic deformation of a cantilever beam with strain-rate sensitivity under impulsive loading....AM 38
Plastic deformation of built-in beams due to distributed dynamic loading.AM 507
Vibration frequencies for a uniform beam with central mass and elastic supports ....AM 556
Vibration frequencies for uniform beams with central masses....AM 335
Vibration frequencies of tapered bars and circular plates....AM 329
Viscoelastic boundary damping of beams and plates....AM 61

BEARINGS. *See also* ANTIFRICTION BEARINGS
Analysis of an improved planetary gear-transmission bearing....B 457
Analysis of plain cylindrical journal bearings in turbulent regime....B 387
Bibliography....B 380, 899
Comparison between theories and experiments for the threshold of instability of rigid rotor in self-acting, plain-cylindrical journal bearings....B 321
Compressible squeeze films and squeeze bearings....B 355, 638
Dynamics of externally pressurized sliders with incompressible and compressible films....B 396
Dynamics of synchronous-precessing turborotors with particular reference to balancing. Part 1—theoretical foundations....AM 115
Effect of misalignment on a circular, externally pressurized, gas-lubricated bearing....AM 141
Effect of the 150-degree partial bearing on rotor-unbalance vibration....B 337
Finite magnetohydrodynamic journal bearing....B 445
Fluid-film bearings (a literature review) ....B 377, 883
Geometry effects on the threshold of half-frequency whirl in self-acting, gas-lubricated journal bearings....B 313
High-speed rotor suspension formed by fully floating hydrodynamic radial and thrust bearings....P 149
Hydrostatic gas journal bearing with journal rotation and vibration....B 328
Influence of finite-wall conductance on load capacity of the magnetohydrodynamic slider bearing....B 436
Load capacity of short journal bearings with oscillating effective speed (squeeze films)....B 348
Lubrication review; developments in bearings and lubricants, a digest of the literature from 1961–1962....B 367
On gas lubrication in turbulent regime..B 475
On some analytical methods for the analysis of gas-lubricated journal bearings (correction)....B 416

BEARINGS (*continued*)
On the variational principle and Lagrange equations in studies of gasdynamic lubrication....AM 43
Performance of centrally pivoted sector thrust-bearing pads—sea trials aboard *USS Barry* (DD 933)....B 483
Rheological behavior of the lubricant in the contact zone of a rolling contact system....B 423
Rolling element bearings (a literature review)....B 894
Short-bearing solution for pressure distribution in a non-Newtonian lubricant ....AM 350
Static and dynamic characteristics of self-acting, partial-arc, gas journal bearings ....B 405

BECK, H. V.
Critical flow function for superheated steam (D)....B 517

BECK, J. V.
Exact solution of the inverse problem in heat conduction theory and applications (D)....HT 380

BECKER, E. C. H.
Vibration frequencies of tapered bars and circular plates....AM 329

BECKER, H. A.
On the tendency to self-preservation in axisymmetric ducted jets (D)....B 771

BECKER, K. M.
Analysis of burnout conditions for flow of boiling water in vertical round ducts ....HT 515
Measurements of burnout conditions for flow of boiling water in a vertical annulus....HT 393
Studies of the developing flow between concentric cylinders with the inner cylinder rotating (D)....HT 391

BECKER, P. W.
Simple stability criterion....B 44

BECKER, S. J.
Linear bending theory of laminated cylindrical shells under axisymmetric load (D)....AM 155

BEER, F. P.
Application of nonstationary shot noise in the study of system response to a class of nonstationary excitations (D) ....AM 730

BEER, J. M.
Flow region near the nozzle in double concentric jets....B 797
Velocity and static-pressure distributions in swirling air jets issuing from annular and divergent nozzles....B 788

BELL, J. C.
Rheological behavior of the lubricant in contact zone of a rolling contact system....B 423

BELLOW, D. G.
Note on the convergence of modified Fourier series applied to the clamped plate problem....AM 558

BENEDICT, R. P.
Some comparisons between compressible and incompressible treatments of compressible fluids....B 527

BENTWICH, MICHAEL
Temperature distribution in cocurrent two-phase (liquid-liquid) laminar flow on inclined surfaces....HT 476
Two-phase viscous axial flow in a pipe...B 669

BERENSON, P. J.
Dominant unstable wavelength and minimum heat flux during film boiling on a horizontal cylinder (D)....HT 225

BERGLES, A. E.
Bubble boundary layer and temperature profiles for forced convection boiling in channel flow (D)....HT 58
Determination of forced-convection surface-boiling heat transfer....HT 365
Influence of flow vibrations on forced-convection heat transfer....HT 559

BERRY, W. R.
Prevention of cyclic thermal-stress cracking in steam-turbine rotors....P 361

BHUTA, P. G.
Orthogonality condition for the exact linearized equations of shallow spherical shells....AM 548
Response of cylindrical shells to moving loads....AM 105

BIENSTOCK, D.
Removal of sulfur oxides from flue gas with alkalized alumina at elevated temperatures....P 353

BINARY LIQUIDS
On the application of the source theory to the solution of problems involving phase change. Part 1—growth and collapse of bubbles....HT 207

BIOT, M. A.
Theory of buckling of a porous slab and its thermoelastic analogy....AM 194
Variational analysis of ablation for variable properties....HT 437

BIRD, G. A.
Transient pressures on structures due to wind gusts....AM 152

BIRKEBAK, RICHARD C.
Effect of surface roughness on the total hemispherical and specular reflectance of metallic surfaces....HT 193
Note on total emittance of animal integuments....HT 287

BIRKEBAK, ROLAND C.
Note on total emittance of animal integuments....HT 287

BIRKHOFF, G.
Review on vortex streets, periodic wakes, and induced vibration phenomena (D) ....B 193

BISSHOPP, K. E.
Mechanical springs. Second edition (BR)....AM 159

BLACK, P. H. (author)
Residual stresses and fatigue in metals (BR)....AM 368

BLADES. *See* STEAM TURBINES

BLANKENSHIP, V. D.
Effects of oscillation on free convection from a vertical finite plate....HT 149
Experimental effects of transverse oscillations on free convection of a vertical, finite plate....HT 159
Laminar free convection from a vertical infinite plate subject to transverse oscillation....AM 383

BLASIUS EQUATION. *See* BOUNDARY LAYER

BLEICH, H. H.
On the disintegration of bodies of (granular) materials governed by the Coulomb rule....AM 1

BLENKARN, K. A.
Buckling of drill pipe in an inclined hole (D)....I 219

BLUSTON, H. S.
Minimization of wave drag on struts, using Mathieu functions....AM 341, 729

BLYTHE, W.
Flügge-Vlasov theory of torsion for thin conical shells....AM 553

BOBCO, R. P.
Radiation heat transfer in semigray enclosures with specularly and diffusely reflecting surfaces....HT 123

BOBROWSKY, ALFRED
Analysis of wire drawing and extrusion through conical dies of large cone angle (D)....I 314

BOGY, D. B.
Buckling of drill pipe in an inclined hole ....I 214
On the buckling of columns....I 252
Stability of a circular rod laterally constrained to be in contact with an inclined circular cylinder....AM 605

BOILER CORROSION
Case histories of hydrogen damage in boilers....P 307
Case history: hydrogen-damage experience in a boiler....P 299
Case history of hydrogen damage....P 350
Embrittlement in one of four boilers...P 325
Experiences with hydro embrittlement in the Consolidated Edison System...P 327
Hydrogen damage in a 1250-psi boiler...P 341
Hydrogen damage in power boilers....P 311
Hydrogen damage to no. 2 boiler at Armstrong Power Station....P 344
Hydrogen embrittlement—a case history ....P 305
Hydrogen embrittlement at Linden Generating Station....P 347

BOILERS. *See* COMBUSTION

BOILING
Analysis of burnout conditions for flow of boiling water in vertical round ducts ....HT 515
Analysis of the critical heat-flux condition in high-pressure boiling water flows.HT 23
Boiling heat transfer with cryogenic fluids at standard, fractional, and near-zero gravity....HT 351
Bubble boundary layer and temperature profiles for forced convection boiling in channel flow....HT 50
Critical heat flux for nearly saturated water flowing normal to a cylinder..HT 59
Critical heat flux for subcooled water flowing normal to a cylinder....HT 68
Critical heat fluxes and flow patterns in high-pressure boiling water flows...HT 12
Determination of forced-convection surface-boiling heat transfer....HT 365
Dominant unstable wavelength and minimum heat flux during film boiling on a horizontal cylinder....HT 220
Film boiling of steam-water mixtures in annular flow at 800, 1100, and 1400 psi (beyond burnout)....HT 81
Film boiling on a horizontal tube in increased gravity fields....HT 213
Heat transfer in film boiling with pulsating pressures....HT 457
Influence of flow vibrations on forced-convection heat transfer....HT 559

BOILING (*continued*)
Instabilities in the flow of a boiling liquid ..... B 213
Measurements of burnout conditions for flow of boiling water in a vertical annulus ..... HT 393
Prediction of low-quality boiling voids ..... HT 327

BOLTED JOINTS
Bolt force to flatten warped flanges ..... I 269

BOLZE, C.
Isothermal bulk modulus of selected fluids to 700 F and 10,000 psig ..... B 463

BOOK REVIEWS
Books on metal processing ..... I 67
Design of space powerplants ..... AM 574
Dynamical problems in elasticity (Progress in solid mechanics, vol. III) ..... AM 735
Dynamics of elastic systems ..... AM 736
Error propagation for difference methods ..... AM 735
Flight performance handbook for orbital operations ..... AM 574
Inertial navigation systems ..... AM 735
Instationare Strömungsvorgange in Rohrleitungen und Verbrennungskraftmaschinen ..... AM 574
Introduction to heat and mass transfer ..... AM 368
Introduction to thermodynamics of irreversible processes ..... AM 368
Limit analysis of rotationally symmetric plates and shells ..... AM 575
Matrix methods in elastomechanics ..... AM 574
Mechanical springs. Second edition ..... AM 159
Methods of quantum field theory in statistical physics ..... AM 735
Nonlinear mathematics ..... AM 736
Nonlinear theory of continuous media ..... AM 368
Residual stresses and fatigue in metals ..... AM 368
Space flight. Vol. II, dynamics ..... AM 159
Temperature response charts ..... AM 159
Thermodynamic properties of helium to 50,000°K ..... AM 159
Vorausberechnung des Teillastverhaltens von Gasturbinen ..... AM 575

BOON, G. B.
Fixed tube-sheet heat exchangers ..... AM 175

BOOY, M. L.
Influence of channel curvature on flow, pressure distribution, and power requirement of screw pumps and melt extruders ..... I 22

BORESI, A. P.
Large deflection of a clamped circular plate including effects of transverse shear ..... AM 540

BOTTEMA, O.
Geared five-bar motion. Parts 1 and 2 (D) ..... AM 361

BOUNDARY LAYER. *See also* BOILING
Adiabatic-wall temperature for flow of a radiation-absorbing gas ..... HT 288
Application of a new method of approximation in the solution of ordinary differential equations to the Blasius equation ..... AM 112
Approximate solution in magnetohydrodynamics ..... AM 555
Combined forced and free-convection laminar flow ..... HT 501
Effect of small cross flow and surface-temperature variation on laminar free convection along a vertical plate (D) ..... AM 573
Effects of buoyancy on the laminar flow from an isothermal cone rotating in a quiet fluid ..... HT 560
First-order perturbations of laminar free-convection boundary layers on a vertical plate ..... HT 107
Heat transfer to the turbulent separated flow of air downstream of a step in the surface of a plate ..... HT 259
Laminar free convection from a vertical infinite plate subject to transverse oscillation ..... AM 383
Laminar free-convection wake above a heated vertical plate ..... AM 131
Laminarization of the turbulent boundary layer in a severe acceleration ..... AM 707
Momentum integral approximation for compressible magnetogasdynamic boundary-layer flow (D) ..... AM 358
On the separation, reattachment, and development of incompressible turbulent shear flow ..... B 221
Radiation effects upon boundary-layer flow of an absorbing gas ..... HT 469
Steady fluid flow in a radial vaneless diffuser ..... B 607
Steady free convection to a flat plate with uniform surface heat flux and nonuniform acceleration ..... HT 562
Transpiration-induced buoyancy and thermal diffusion-diffusion thermo in a helium-air free convection boundary layer ..... HT 508
Turbulent flow at the plane of symmetry of a collateral three-dimensional boundary layer ..... B 227

BOUSSINESQ'S PROBLEM. *See* MATHEMATICS

BOVET, G.
Stresses in a hydraulic turbine stay ring (D) ..... P 82

BOVET, TH.
Stresses in a hydraulic turbine stay ring (D) ..... P 82

BOWEN, C. W.
Results of a fifteen-year program of flexural fatigue testing of gear teeth (D) ..... I 238

BOWIE, D. L.
Rectangular tensile sheet with symmetric edge cracks ..... AM 208

BOWIE, OSCAR
Symmetric edge cracks in tensile sheet with constrained ends ..... AM 726

BOYADJIEFF, G.
Some applications of the maximum principle to second-order systems, subject to input saturation, minimizing error, and effort ..... B 11

BOYD, JOHN
Fluid centering of pistons ..... AM 390
Influence of fluid forces on the sticking and the lateral vibration of pistons ..... AM 397

BRADFIELD, W. S.
Design, calibration, and application of a miniature total temperature probe ..... HT 462

BRAKES
Crushing of a tube between rigid plates (D) ..... AM 357

BRAM, JOSEPH (author)
Nonlinear mathematics (BR) ..... AM 736

BRANDT, F. A.
Assessment of steels for nuclear reactor pressure vessels (D) ..... P 401

BRAYTON CYCLE. *See* THERMODYNAMICS

BRESLIN, J. P.
Unsteady forces due to propeller-appendage interactions (D) ..... AM 359

BREWER, R. C.
An energy approach to the mechanics of discontinuous chip formation ..... I 157

BRIDGEMAN, D. C.
Vapor pressure tables for water ..... HT 279

BRIGGS, D. G.
Transient free convection about vertical plates and circular cylinders ..... HT 490

BRIGHTON, J. A.
Fully developed turbulent flow in annuli ..... B 835

BROBERG, B.
On the speed of a brittle crack ..... AM 546

BROBERG, K. B.
Dynamical problems in elasticity (Progress in solid mechanics, vol. III) (BR) ..... AM 735

BROCK, J. E.
Note on thermal stresses in cylinders and some related problems ..... AM 559
Some secondary effects in a simple piping structure under heating ..... AM 88

BRODKEY, ROBERT S.
Analysis of the critical heat-flux condition in high-pressure boiling water flows (D) ..... HT 33

BROERSMA, G.
Results of a fifteen-year program of flexural fatigue testing of gear teeth (D) ..... I 237

BROSCHARD, J. L.
Analysis of an improved planetary gear-transmission bearing ..... B 457

BROWN, F. T.
Combined analytical and experimental approach to the development of fluid-jet amplifiers ..... B 175
Simplification of hydraulic line dynamics by use of infinite products (D) ..... B 9

BROWN, R. O.
High performance low pressure turbine elements ..... P 386

BROXMEYER, CHARLES (author)
Inertial navigation systems (BR) ..... AM 735

BUBBLES. *See also* BOILING
On the application of the source theory to the solution of problems involving phase change. Part 1—growth and collapse of bubbles ..... HT 207
On the mechanism of head breakdown in cavitating inducers ..... B 291
Stability of an annulus of liquid in a tube ..... B 666

BUCKLING
Buckling of a thin-walled circular cylindrical shell heated along an axial strip ..... AM 253
Buckling of a very thin cylindrical shell due to an impulsive pressure ..... AM 267
Buckling of drill pipe in an inclined hole ..... I 214
Elastic cylindrical shell under nearly uniform radial impulse ..... AM 259
Note on the instability of circular rings confined to a rigid boundary ..... AM 559
On the buckling of columns ..... I 252

BUCKLING (*continued*)
On the stability of elastic systems subjected to nonconservative forces ..... AM 435
Stability of a circular rod laterally constrained to be in contact with an inclined circular cylinder ..... AM 605
Theory of buckling of a porous slab and its thermoelastic analogy ..... AM 194
Unsymmetrical buckling of thin shallow spherical shells ..... AM 447

BULK MATERIALS
Steady gravity flow of frictional-cohesive solids in converging channels ..... AM 5
Stress and velocity fields in the gravity flow of bulk solids ..... AM 499

BULK MODULUS. *See* LIQUIDS, LUBRICANTS

BULLOCK, R. O.
Analysis of Reynolds number and scale effects on performance of turbomachinery ..... P 247

BUNGAY, R. W.
On the stability of elastic systems subjected to nonconservative forces ..... AM 435

BUNT, E. A.
Confirmation of Gambill-Greene straight-flow burnout heat flux equation at higher flow velocity ..... HT 297

BUOYANCY. *See* HELIUM

BURGGRAF, O. R.
Exact solution of the inverse problem in heat conduction theory and applications ..... HT 373

BURKET, W. G.
On the tribomechanics of rolling (D) ..... I 356

BURMESTER THEORY. *See* KINEMATICS

BURNERS
Case history: hydrogen-damage experience in a boiler ..... P 299

BURNOUT. *See* BOILING, HEAT TRANSFER

BURST STRENGTH. *See* SHELLS

BURTON, R. A.
Analysis of plain cylindrical journal bearings in turbulent regime (D) ..... B 394
Rheological behavior of the lubricant in the contact zone of a rolling contact system (D) ..... B 433

BUTLER, H. W.
Angular momentum equations for a swivel-nozzle rocket ..... AM 355

C

CABLES
Motion of a stretched string carrying a moving mass particle ..... AM 29
Pendulation of pipes and cables in water ..... I 299

CALIBRATORS. *See* INSTRUMENTS—PRESSURE

CAMBEL, A. B.
Momentum integral approximation for compressible magnetogasdynamic boundary-layer flow (AC) ..... AM 359

CAMERON, A.
Performance of centrally pivoted sector thrust-bearing pads—sea trials aboard *USS Barry* (DD 933) (D) ..... B 496

CAMS
Vibration of cams having two degrees of freedom ..... I 343

CAPILLARIES. *See* TUBES

CARBIDES. *See* MACHINE TOOLS

CARLSON, R. L.
Compression of a viscoplastic disk ..... B 700

CARMAN, C. M.
Crack-toughness testing of strain-rate sensitive materials (D) ..... P 450
Fracture toughness and pressure vessel performance ..... P 465

CARMODY, THOMAS
Establishment of the wake behind a disk ..... B 869

CASCADES. *See* COMPRESSORS, FLOW OF FLUIDS, TURBINES

CAST IRON
Machinability of nodular cast irons. Part III—tool life of carbide and ceramic cutting tools ..... I 141

CAVITATION. *See also* FLOW OF FLUIDS
Cavitation properties of liquids ..... P 195
Cavitation tests on hydrofoils designed for accelerating flow cascade: Report 3—five profiles generated from prescribed pressure configurations of types 1 and 3 ..... B 543
Design comments and experimental results for cavitation-resistant inducers up to 40,000 suction specific speed ..... P 176
Experimental investigations of incipient and desinent cavitation ..... B 275
Inverse methods in the linearized theory of fully cavitating hydrofoils ..... B 641
Linearized theory of a supercavitating hydrofoil with a jet flap ..... B 851
Nucleation characteristics of static liquid nitrogen and liquid hydrogen ..... P 485

CAVITATION (*continued*)
On the mechanism of head breakdown in cavitating inducers....B 291
Theory for supercavitating flow through an arbitrary form hydrofoil....B 285
Visual and photographic study of the inception of vaporization in adiabatic flow....B 257
Void fraction measurements in a cavitating venturi....B 265

CAVITY FLOW. *See* FLOW OF FLUIDS

CERAMICS. *See also* MACHINE TOOLS
Variational analysis of ablation for variable properties....HT 437

CERMAK, J. D.
Two-phase pressure drop across vertically mounted thick plate restrictions...HT 227

CESS, R. D.
Adiabatic-wall temperature for flow of a radiation-absorbing gas....HT 288
Radiation effects upon boundary-layer flow of an absorbing gas....HT 469

CHAHINE, M. T.
Heat transfer and forces for free-molecule flow on a concave cylindrical surface (D)....HT 9

CHANDIRAMANI, K. L.
Investigations on the nature of surface finish and its variation with cutting speed....I 134

CHANG, C. H.
Solutions of plane problems in dynamic thermoelasticity....AM 543

CHAO, CHI-CHANG
Buckling of a thin-walled circular cylindrical shell heated along an axial strip....AM 253
On the flexural motions of plates at the cut-off frequency....AM 22

CHEN, M. M.
Heat, mass, and momentum transfer inside frosted tubes—experiment and theory....HT 334

WAKES. *See* FLOW OF FLUIDS, HYDRODYNAMICS

WALLIS, G. B.
Estimation of steady-state steam void-fraction by means of the principle of minimum entropy production (D)..HT 252

WALOWIT, J.
Stability of flow between arbitrarily spaced concentric cylindrical surfaces including the effect of a radial temperature gradient....AM 585

WALSH, R. A.
Fixed tube-sheet heat exchangers....AM 175

WALSTON, W. H.
Dynamic stability of rotating shafts in viscous fluids (critical speed determination)....AM 291

WANG, D. P.
Approximate numerical scheme for the theory of cavity flows past obstacles of arbitrary profile....B 556

WANG, HUBERT
Analysis of piecewise linear systems by the method of integral equations....B 139

WANG, P. K. C.
Optimum control of distributed-parameter systems....B 67

WARNER, C. F.
Effects of selected gas stream parameters and coolant properties on liquid film cooling....HT 271

WARNER, DWAIN W.
Note on total emittance of animal integuments....HT 287

WARNER, P. C.
Effect of the 150-degree partial bearing on rotor-unbalance vibration....B 337

WARREN, W. E.
Note on the transient axisymmetric thermoelastic problem for the solid sphere....AM 348

WATER. *See also* BOILING, STEAM-WATER MIXTURES
Rational equation of state for water and water vapor in the critical region...HT 320
Vapor pressure tables for water....HT 279

WATER HAMMER
Dynamic response of fluid lines....B 589
Rigid water-column theory in water-hammer problems....B 583
Simplification of hydraulic line dynamics by use of infinite products....B 1

WATER TABLES. *See* FLOW OF FLUIDS

WATER TUNNELS
Experimental investigations of incipient and desinent cavitation....B 275

WATER VAPOR. *See* STEAM

WAVE DRAG. *See* HYDRODYNAMICS

WAVE MECHANICS. *See also* MODELS, SHOCK
Bilinear theories in plasticity and an application to two-dimensional wave propagation....AM 181
Diffraction of steady elastic waves by surfaces of arbitrary shape (D)....AM 570
Longitudinal impact on viscoplastic rods—approximate methods and comparisons....AM 611
On the flexural motions of plates at the cut-off frequency....AM 22
Transient compressional waves in an infinite elastic plate with a circular cylindrical cavity....AM 627
Uniaxial wave propagation in realistic viscoelastic materials....AM 17
Wave heights and damping coefficients for half-submerged ellipsoids in low-frequency sway and yaw....AM 597
Wave propagation in a two-layered medium....AM 213, 729
Wave propagation in a viscoelastic material with temperature-dependent properties and thermomechanical coupling....AM 423

WEAR
Effect of surface energy on the wear process....B 306
Friction and wear (a literature review)....B 368, 897

WEHE, R. L.
Fluid-film bearings (a literature review).B 377

WEIL, N. A.
Effect of end conditions on the burst strength of finite cylinders....AM 97

WEINER, J. H.
Stresses in an elastic-plastic cylinder due to a dilatational phase transformation....AM 148

WELCH, C. P.
Individual row heat transfer in a crossflow in-line tube bank....HT 143

WELDING
Production applications of electron beam welding....I 280

WELLAUER, E. J.
Deflection of spur gear teeth cut in thin rims (D)....I 342
Results of a fifteen-year program of flexural fatigue testing of gear teeth (D)....I 239

WERNICK, R. J.
Analysis of plain cylindrical journal bearings in turbulent regime....B 387
Static and dynamic characteristics of self-acting, partial-arc, gas journal bearings....B 405

WERTH, G. C.
Diffraction of steady elastic waves by surfaces of arbitrary shape (D)....AM 571

WHIRL. *See* BEARINGS, VIBRATION

WHITACRE, GALE R.
Visual and photographic study of the inception of vaporization in adiabatic flow (D)....B 262

WHITE, F. M., JR.
Problem of pneumatic pressure lag. Part 1—steady-state flow in a tubing system....B 234
Part 2—unsteady flow in a tubing system closed at one end....B 241

WIEDMANN, M. L.
Funicular polyhedra (D)....AM 358

WILLIAMS, F. A.
Influence of the equilibrium dissociation of a diatomic gas on Brayton-cycle performance (D)....AM 367

WILLIAMS, M. L.
Bending stress in a cracked plate on an elastic foundation (AC)....AM 366

WILMS, E. V.
On coupling effects in transient thermoelastic problems....AM 719

WILSON, C. D.
Design of 100-mw steam turbine-generator unit for Ravenswood No. 3....P 209

WILSON, D. R.
Isothermal bulk modulus of selected fluids to 700 F and 10,000 psig....B 463

WILSON, H. B., JR.
Contact stresses in an infinite plate containing a smooth rigid elliptic insert....AM 703

WILSON, P. E.
Large deflection of a clamped circular plate including effects of transverse shear....AM 540

WIND PRESSURE. *See* STRUCTURES

WIND TUNNELS
Establishment of the wake behind a disk....B 869

WINN, L. W.
Geometry effects on the threshold of half-frequency whirl in self-acting, gas-lubricated journal bearings....B 313

WINTER, E. R. F.
Summary of experiments on a transpiration-cooled electric-arc heat-transfer system....HT 131

WIRE. *See* METAL DRAWING

WOJCIK, CHARLES K.
Analytical representation of the root-locus....B 37

WOJTOWICZ, W. J.
Metalworking lubricants (a literature review)....B 371, 888

WOLVERTON, R. L. (author)
Flight performance handbook for orbital operations (BR)....AM 574

WONG, P. T. Y.
Dominant unstable wavelength and minimum heat flux during film boiling on a horizontal cylinder....HT 220

WONHAM, W. M.
Optimal bang-bang control with quadratic performance index....B 107

WOOD, GLENN M.
Application of pressure and velocity criteria to the design of a centrifugal-pump impeller and inlet (D)....P 188

WRIGHT, M. K.
Design comments and experimental results for cavitation-resistant inducers up to 40,000 suction specific speed...P 176

WU, S. M.
Cutting-tool temperature-predicting equation by response-surface methodology....I 150
First-order five-variable cutting-tool temperature equation and chip equivalent....I 395
Tool-life testing by response surface methodology—Parts 1 and 2....I 105, 111

WU, T. YAO-TSU
Approximate numerical scheme for the theory of cavity flows past obstacles of arbitrary profile....B 556

WU, TAI TE
Note on the early plastic deformation of aluminum crystals in simple tension....AM 711

Y

YAMAMOTO, TOSHIO
On the unstable vibrations of a shaft carrying an unsymmetrical rotor..AM 515

YANEK, E. J.
Stresses in a hydraulic turbine stay ring (D)....P 83

YANG, A. T.
Application of dual-number quaternion algebra to the analysis of spatial mechanisms....AM 300

YANG, KWANG-TZU
Effect of small cross flow and surface-temperature variation on laminar free convection along a vertical plate (AC)....AM 573
First-order perturbations of laminar free-convection boundary layers on a vertical plate....HT 107
Laminar free-convection wake above a heated vertical plate....AM 131

YANG, WEN-JEI
On the application of the source theory to the solution of problems involving phase change. Part 1—growth and collapse of bubbles....HT 207
Part 2—transient interface heat and mass transfer in multicomponent liquid-vapor system....HT 443, 565
Transient heat transfer in a vapor-heated heat exchanger with arbitrary timewise-variant flow perturbation....HT 133

YAW. *See* SHIPS

YELLOTT, JOHN I.
Solar energy progress report—1963...P 475

YEN, J. T.
Influence of wall conductance on magnetohydrodynamic channel-flow heat transfer (D)....HT 557

YEW, CHING-HSIE
Stress distributions in soft metals due to static and dynamic loading by a steel sphere....AM 635

YIELD BEHAVIOR. *See* STRESSES AND STRAINS

YOUNG, J. O.
Experimental investigations of incipient and desinent cavitation....B 275

YOUNG, R. J.
Effect of small cross flow and surface-temperature variation on laminar free convection along a vertical plate (AC)....AM 573

YU, YI-YUAN
Torsion of bars with isosceles triangular and diamond sections....AM 332

Z

ZAHN, W. R.
Visual study of two-phase flow while evaporating in horizontal tubes....HT 417

ZAK, A. R.
Stresses in the vicinity of boundary discontinuities in bodies of revolution.AM 150

ZARETSKY, E. V.
Rheological behavior of the lubricant in the contact zone of a rolling contact system (D)....B 434

ZAWADZKI, E. A.
Removal of sulfur oxides from flue gas with alkalized alumina at elevated temperatures (D)....P 358

ZERO-G FIELD. *See* SPACE VEHICLES

ZIMMERMAN, J. R.
Five precision point synthesis of the four-bar function generator....AM 563

ZIVI, S. M.
Estimation of steady-state steam void-fraction by means of the principle of minimum entropy production....HT 247
